Office of the Chief Inspector of Mines

Dhanbad, the 7th April 1966

No. 16380/Z—In exercise of the powers conferred on me under sub-section (3) of regulation 60 of the Metalliferous Mines Regulations, 1961, I, the undersigned, hereby, require that all plans and sections prepared or submitted in accordance with the provisions of the Metalliferous Mines Regulations, 1961, shall be accurate within the limits of error as specified in the Schedule.

G. S. GABBI

Chief Inspector of Mines

SCHEDULE

SPECIFICATIONS OF LIMITS OF ERROR

PLANS

1. Plotting Errors

All surface and underground surveys shall be plotted on the plan of the mine so that in the case of a plan on the scale of 1/2,000, all points in the survey are correct by scale to their calculated co-ordinate position within a limit not exceeding 50 centimetres. In case of a plan prepared on the scale of 1/1,000, the corresponding limit of error shall not exceed 25 cm.

SURFACE SURVEYS

2.1. Triangulation Station Points

The position of every station point of triangulation with reference to the point of origin of the survey, calculated from an initial base line (or the Survey of India topo triangulation stations) shall agree with the position of that station point, calculated from a verification base line, within a limit of error not exceeding 1/5,000th of the linear horizontal distance of the station point from the point of origin.

2.2. Traverses

Every traverse made between station points of a triangulation and/or for the determination of the boundaries of the mine or for the determination of other important surface details, shall be closed polygonally and shall be made within limits of error as follows:

- (i) The total angular error of the traverse shall not exceed $30 < n$ seconds when 'n' is the number of observing stations (including the initial and closing stations).
- (ii) The error of closure (Calculated by co-ordinates) after distribution of the total angular error shall not exceed 1/3,000th of the sum of the horizontal lengths of the drafts of the traverse.

UNDERGROUND SURVEYS

3.1. Instruments for Main Road Traverses

Every traverse made to determine or check the position of an underground survey station or to check the position of the main roadways of a mine shall be made with a theodolite the smallest reading of which does not exceed 20 seconds of arc, and all measurements shall be made with a steel band or steel tape not less than 30 metres in length.

3.2. Angular Error of Closed Traverses

The total angular error of any underground traverse or check survey which has been closed polygonally shall not exceed $(20 + x) < n$ seconds, in which expression the value of 'x' is 10 seconds or the smallest reading in seconds of sub-division of the circle of the instrument employed (whichever is the greater) and 'n' is the number of observing stations.

3.3. Co-ordinate Error of Closed Traverses

The error of closure of any underground traverse of check survey which has been closed polygonally (calculated by co-ordinates after distribution of the total angular error) shall not exceed 1/2,500th of the sum of the horizontal lengths of the drafts of the traverse.

3.4. Co-ordinate Error of Open Traverse

Where an underground traverse has commenced from and closed upon surface reference points or upon survey stations of which the co-ordinates have previously been determined, but has not been closed polygonally, the error of closure (calculated by co-ordinates) shall not exceed 1/1,500th of the sum of the horizontal lengths of the drafts of the traverse.

3.5. Subsidiary Surveys

Subsidiary surveys, to determine the position of any line of face or stoped out area and the positions of road junctions made between any two stations of a check surveys, shall have a permissible limit of error of closure by plotting not exceeding 1/500th of the sum of the horizontal lengths of the drafts of the survey.

3.6. Checking Subsidiary Surveys

Where it is impracticable to maintain underground check survey stations, and/or where subsidiary surveys cannot be closed upon check survey stations, the difference in location of any point on the line of face or stoped out area as determined by any two or more such surveys shall not exceed 3 metres.

3.7. Errors of Correlation by Wires

The correlations of the surface and the underground workings carried out by:

- (i) a single wire in each of two or more shafts,

or

- (ii) two or more wires in a single shaft shall be deemed to be within the required limit of error when the difference in values of the azimuth of any reference line of the underground survey relative to the surface reference base line, as determined by two or more independent series of observations between wires, does not exceed two minutes of arc.

3.8. Errors of Magnetic Correlation

The correlation of the surface and underground workings by precise magnetic observations (carried out by magnetic observations on the surface reference base line and by magnetic observations on not less than two underground observation lines, each tested independently for magnetic attraction and corrected by a traverse survey carried within the limit of error required by para 3.3 above) shall be deemed to be within the required limit of error when (after distribution of the permissible angular error in the traverse connecting the underground observation base lines) the difference of azimuth between those base lines so determined agrees with the difference of bearing between the base lines as determined by magnetic observation relative to the surface reference base line, within a limit of error not exceeding two minutes of etc arc.

3.9. Errors of Correlation by Direct Connection

For the correlation of the surface and underground workings by direct connections through adits and inclines the traverse connection from, or between the points of reference to the surface shall be carried out within a limit of error required by para 3.3 and the correlation shall be deemed to be within the required limit of error when (after distribution of the permissible angular error in the traverse the values of the azimuth of any underground reference line relative to the surface reference base line, as determined by any two or more such independent surveys, agree within a limit of error not exceeding one minute of arc.

CORRELATION

By shaft wires	2 minutes of arc.
By magnetic observations	2 minutes of arc.
By direct connection	1 minute of arc.

LEVELS

Surface mine bench marks	2 cms. per kilometre.
Inset bench marks	Two or more shaft measurements to establish inset bench mark should agree within 1/5,000.
Inbye bench marks	1/2,500th of the inclined length of the levelling.
Subsidiary points	50 centimetres.

LEVELS**4.1. Errors of Surface Levels**

The levelling to determine mine surface bench marks shall commence from a railway bench mark and close upon a second railway bench mark within a limit of error not exceeding 2 centimetres per kilometre. Where Survey of India bench marks are available, the railway bench marks and the Survey of India bench marks shall be linked by a levelling within a limit of error not exceeding 2 centimetres per kilometre, and thereafter a note shall be made on the plan giving the correction relating the surface bench mark value with the Survey of India levelling and National Datum-Mines fixed at 5,000 metres below mean sea level.

4.2. Errors for Underground Bench Marks

The levels of shaft inset bench marks shall be determined by shaft measurements and shall be deemed to be within the required limit of error when any two or more measurements from the surface bench marks to the mine inset bench marks agree within a limit of error not exceeding 1/5,000th.

4.3. Errors of Underground Levelling

All underground levelling made to determine or check the levels of underground bench marks shall close within a limit of error not exceeding 1/2,500th of the inclined length of the route of the levelling.

4.4. Subsidiary Levels

In the case of subsidiary levellings made to determine the level of any point on a line of face or stoped out area or of any other part of the workings and which are not closed between underground bench marks, the difference in the levels of any such point as determined by any two or more such levellings shall not exceed 50 centimetres.

SUMMARY OF LIMITS OF ERROR**PLANS**

Plans on the 1/2,000 scale—50 centimetres.
Plans on the 1/1,000 scale—25 centimetres.

(ii) Certificate of Age.—The date of birth ordinarily accepted by the Commission is that entered in the Matriculation Certificate or in the Secondary School Leaving Certificate, or in a certificate recognised by an Indian University as equivalent to Matriculation or in an extract from a Register of Matriculates maintained by a University, which extract must be certified by the proper authority of the University. The expression Matriculation Certificate in this part of the instructions must be understood as including these alternative certificates. Candidates will thus understand that the Matriculation Certificate is required in all cases as evidence of age, and it must invariably be sent to the Commission, in original, with a copy thereof, together with the application.

Sometimes the Matriculation or equivalent Certificate does not show the date of birth, or only shows the age by completed years or completed years and months. In such cases a candidate must send in addition to the Matriculation or equivalent certificate, an original certificate, together with a copy thereof, from the Headmaster/Principal of the institution from where he passed the Matriculation or equivalent examination, showing the date of his birth or his exact age as recorded in the Admission Register of the Institution.

Such a candidate will be required to submit his original Matriculation or equivalent certificate before he is admitted to the National Defence Academy. He will be disqualified if later on it is found that the date of birth claimed by him in the application differs from that entered in his Matriculation or equivalent certificate unless the discrepancy is explained to the satisfaction of the Union Public Service Commission.

Candidates are warned that unless complete proof of age as laid down in these instructions is sent with an application, the application may be rejected. Further, they are warned that if the date of birth stated in the application is inconsistent with the age shown in the Matriculation Certificate and no explanation is offered, the application may be rejected.

NOTE 1.—A candidate who holds a completed Secondary School Leaving Certificate need submit with the original a copy of only the page containing entries relating to age.

NOTE 2.—CANDIDATES SHOULD NOTE THAT ONCE A DATE OF BIRTH HAS BEEN CLAIMED AND ACCEPTED BY THE COMMISSION FOR THE PURPOSE OF ADMISSION TO AN EXAMINATION, NO CHANGE WILL ORDINARILY BE ALLOWED AT A SUBSEQUENT EXAMINATION.

NOTE 3.—A candidate who has passed the 10th Class of (i) a recognised Higher Secondary School, (ii) a recognised School preparing students for the Indian School Certificate Examination, and (iii) Technical Higher Secondary School of the Delhi Polytechnic, must submit a certificate of age in the form prescribed under Note 2 below para 4(iii) from the Principal of the School concerned and no other certificate as evidence of age will be required.

The certificate submitted must be one issued by the authority (*i.e.* University or other examining body) awarding the particular qualification. If such a certificate or diploma

is not submitted, the candidate must explain its absence and submit such other evidence, in original as he can to support his claim to the requisite qualifications. The Commission will consider this evidence on its merits but do not bind themselves to accept it as sufficient.

NOTE 1.—A candidate, who has appeared at an examination the passing of which would render him eligible to appear at this examination but has not been informed of the result, or who intends to appear at such a qualifying examination, may apply for admission to this examination, but he must submit a certificate in the form prescribed below, from the Headmaster/Principal of the School concerned. Such a candidate will be admitted to this examination, if otherwise eligible, but the admission would be deemed to be provisional and subject to cancellation if he does not produce proof of having passed the examination, as soon as possible, and in any case not later than 30th June, 1967.
